statement

I see myself as an ambitious technically minded individual with excellent problem solving skills and a computing background. I'm highly motivated, being the main driving force for a software project which developed my communication and organisational skills.

I have proven experience with *HTML5, Javascript, Wordpress and Bootstrap* I am now looking for a position of work where I can utilise the skills and experience which I have acquired. I am fully flexible with hours and am more than happy to commute.

personal skills

- Excellent verbal communication skills.
- Ability to remain calm and work well under pressure of deadlines.
- Well organised and meticulous approach to work.
- Able to analyse complex problems and assess possible solutions.
- Motivated, enthusiastic and meticulous.
- Works well in a team and able to work alone using own initiative.

experience

2015
